

Standard Bank International Funds Limited

Multi Manager Absolute Return Fund (GBP)

Fact Sheet - 31 January 2020

Minimum Disclosure Document

Fund Investment Objectives and Style

The Multi Manager Absolute Return Fund (the "Fund") seeks to generate positive returns that are independent of market cycles, by targeting enhanced return opportunities through a diversified range of investment strategies. These seek to provide either a regular reliable income stream, or inflation-protected returns, where the prime investment objective is to preserve the real value of capital. The principal investment policy of each class is to be invested in a diversified blend of single manager funds (OIECs), Absolute Return Fixed Income funds (UCITS), investible indices, exchange tradable securities, forward foreign exchange contracts and cash positions.

Dynamic Multi Asset Exposure

The Fund is a dynamic multi asset global investment solution it seeks to compound total returns above the rate of inflation with low levels of volatility, and with limited correlation to equity and traditional fixed income markets. The Fund adjusts its asset allocation & currency exposure within pre-defined

Asset Allocation:

■ Yielding Assets 43.98% ■ Diversifiers 35.10% ■ Growth With Protection 20.04% ■ Cash 0.88%

Allocations

Yielding Assets: funds with exposure to assets that have historically produced a real (in excess of inflation) yield. This will predominantly be split between specialist fixed income strategies and exposure to UK physical property, via a small number of funds that offer daily liquidity and are diversified, relative to each other, by property segment, lot size and geography.

Growth With Protection: funds with an asymmetric return profile, generally either providing some exposure to equity market upside while limiting downside exposure, or by producing return streams independent of broad equity direction.

Diversifiers: funds which are managed to produce a target return, largely macro driven, or which invest into non-mainstream markets (including currencies, commodities and futures).

NOT FOR CIRCULATION TO THE GENERAL PUBLIC OUTSIDE OF JERSEY

Investment in the shares of open-ended investment companies is generally a medium to long-term investment. The value of shares may go down as well as up and investors may get back less cash than originally invested. Past performance figures quoted refer to the past, and past performance is not a reliable indicator of future results. The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Income is reinvested on the reinvestment date. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. The funds can engage in borrowing and scrip lending. The shares of Standard Bank International Funds Limited are traded at ruling prices (i.e. the last recorded sales price) and are priced daily using the forward pricing method. The price of the fund is available from the manager on request or via Bloomberg or Morningstar. Details of fees and charges and maximum commissions are available on request from STANLIB Fund Managers Jersey Limited, the Manager, and are fully disclosed in the fund prospectus. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.

Standard Bank International Funds Limited is a fund of funds collective investment scheme, which only invests in other collective investment schemes, which levy their own charges, which could result in a higher fee structure for the fund of funds. Commission and incentives may be paid and if so, are included in the overall costs. Figures quoted are from the Manager and Morningstar/Bloomberg for the current month for a lump sum investment using NAV prices, which exclude initial fees. Standard Bank International Funds Limited is an accumulation fund and does not distribute income. Performance is quoted in Sterling terms. Please refer to the prospectus of this scheme for more details, a copy of which is available on request from the Manager, the registered office of which is Standard Bank House, 47-49 La Motte Street, St Helier, Jersey JE2 4SZ, Channel Islands. Other than the fund-specific data contained in this document, the information provided has been compiled from a number of freely available market sources that are believed to be reliable. We make no warranty, express or implied, as to the accuracy, correctness or completeness of the general market information contained herein.

Total Expense Ratio (TER): This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over a rolling three years (where applicable) and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.

Transaction Costs (TC): The percentage of the value of the fund as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): The percentage of the value of the Fund incurred as costs, relating to the investment of the Fund. As fund returns are reported after deducting all fees and expenses, these costs (the TER & TC) should not be deducted from the fund returns. It is the sum of the TC & TER.
