

Standard Bank International Funds Limited

Multi Manager Global Equity Fund (GBP)

Fact Sheet - 31 January 2020

Minimum Disclosure Document

Fund Investment Objectives and Style

The Multi Manager Global Equity Fund (the "Fund") is designed to provide long-term capital appreciation through investment solely in equity orientated funds. The manager will look to maintain a fully invested strategy at all times. A minimum exposure of 40% to larger capitalised shares means that the manager can position the fund significantly away from that of the peer group or benchmark in order to optimise performance. It is therefore suited to investors who are willing to accept the higher level of volatility associated with a fund of this flexibility.

The Fund is a highly diversified one stop global equity investment solution investing in a dynamic blend of best of breed regional managers covering a wide range of investment styles. The Fund also seeks to offer clients meaningful exposure to niche areas of the equity markets with long term structural tailwinds to company earnings growth such as mid cap, small cap and other thematic strategies. This is achieved via specialist managers with the expertise, experience and resources to invest in these markets.

Investment Themes

- Mid & Small Cap Companies:** Exhibit structurally higher earnings growth rates than large and mega cap companies. We believe that active fund managers in these sectors have greater potential to outperform market indices given the limited analyst coverage, broader universe of stocks and greater dispersion of winners and losers.
- Technological Change:** The technology sector continues to take share of the global economy and this trend is only going to accelerate. Our managers can access investments with genuine exponential growth opportunities as we progress into the digital age.
- Global Healthcare:** Global healthcare demand is set to grow substantially in the decades ahead due to ageing populations in developed market countries. Using a specialist manager with industry expertise we are able to access exciting new technologies in medical science along with leading healthcare services and pharmaceutical businesses.
- Emerging Market Growth:** Our focus is on the domestic wealth cycle of emerging countries where demographics and organic growth make for a powerful long term investment thesis.

Theme	Fund	Weight	Theme	Fund	Weight
	Unicom UK Smaller Companies Fund	4.18%		GAM Star Technology Fund	4.07%
	Aberforth UK Smaller Companies Fund	3.98%		Polar Healthcare Opportunities Fund	5.04%

NOT FOR CIRCULATION TO THE GENERAL PUBLIC OUTSIDE OF JERSEY AND SOUTH AFRICA

Investment in the shares of open-ended investment companies is generally a medium to long-term investment. The value of shares may go down as well as up and investors may get back less cash than originally invested. Past performance figures quoted refer to the past, and past performance is not a reliable indicator of future results. The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and divided withholding tax. Income is reinvested on the reinvestment date. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. The funds can engage in borrowing and scrip lending. The shares of Standard Bank International Funds Limited are traded at ruling prices (i.e. the last recorded sales price) and are priced daily using the forward pricing method. The price of the fund is available from the manager on request or via Bloomberg or Morningstar. Details of fees and charges and maximum commissions are available on request from STANLIB Fund Managers Jersey Limited, the Manager, and are fully disclosed in the fund prospectus. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.

Standard Bank International Funds Limited is a fund of funds collective investment scheme, which only invests in other collective investment schemes, which levy their own charges, which could result in a higher fee structure for the fund of funds. Commission and incentives may be paid and if so, are included in the overall costs. Figures quoted are from the Manager and Morningstar/Bloomberg for the current month for a lump sum investment using NAV prices, which exclude initial fees. Standard Bank International Funds Limited is an accumulation fund and does not distribute income. Performance is quoted in Sterling terms. Please refer to the prospectus of this scheme for more details, a copy of which is available on request from the Manager, the registered office of which is Standard Bank House, 47-49 La Motte Street, St Helier, Jersey JE2 4SZ, Channel Islands. Other than the fund-specific data contained in this document, the information provided has been compiled from a number of freely available market sources that are believed to be reliable. We make no warranty, express or implied, as to the accuracy, correctness or completeness of the general market information contained herein.

A representative agreement exists between STANLIB Collective Investments (RF) Pty Limited and STANLIB Fund Managers Jersey Limited.

Annualised figures are figures expressed in yearly terms, even though the variable does not directly apply to a year. Cumulative figures are figures expressed fully by the accumulation of successive additions.

Important Notice for UK Investors: this document does not constitute a financial promotion for the purposes of section 21 of the Financial Services and Markets Act 2000 (FSMA). UK residents should be aware that the protections provided to investors by the UK regulatory system established under FSMA do not apply to any investment services or products provided by Standard Bank Group Limited or any of its subsidiaries. In particular, investors will not be entitled to compensation from the Financial Services Compensation Scheme, nor will they be entitled to the benefits provided by the Financial Ombudsman Service or other protections to customers under FSMA. Furthermore, UK residents should be aware that the fund to which this document relates is not a UCITS fund and is not recognised under sections 270 or 272 of FSMA.

South Africa disclosure: The Standard Bank of South Africa Limited, an authorised Financial Services Provider ("FSP") number 11287. Standard Bank Financial Consultancy, an authorised Financial Services Provider (FSP 3825).

Total Expense Ratio (TER): This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over a rolling three years (where applicable) and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.

Transaction Costs (TC): The percentage of the value of the fund as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): The percentage of the value of the Fund incurred as costs, relating to the investment of the Fund. As fund returns are reported after deducting all fees and expenses, these costs (the TER & TC) should not be deducted from the fund returns. It is the sum of the TC & TER.

All transactions to the account are to be in line with current Exchange Control Regulation to the country in which you are resident or working.

Telephone calls may be recorded. Please refer to the Standard Bank Offshore Group Client Privacy Statement available from www.international.standardbank.com
