Important Information

The product summary gives a basic explanation of the product payout. For a full description of the product terms please read all literature pertaining to the specific product. In the event of a discrepancy arising, the Issuer's Final Terms in relation to Structured Notes or the product brochure in relation to Structured Deposits will prevail.

The current indicative maturity value shows the indicative return if the level(s) of the underlying reference(s) to which the performance is linked, remain(s) unchanged until maturity. It is more than likely that the actual maturity value will turn out to be different to the current indicative maturity value at the end of the investment period because the level(s) of the underlying reference(s) change(s) continuously. Depositors and investors should therefore be aware that their returns can go down as well as up and are likely to fluctuate during the investment term. For certain products the fluctuation in the indicative maturity value can be large even with small changes in the underlying reference(s) to which the performance is linked, for example the level of the underlying references is linked to a trigger event such as determining whether a Defined Return is paid or an early maturity event.

The current indicative maturity value is unlikely to equal the current market value as several factors including prevailing interest rates, market volatility, credit quality of the issuer / deposit taker and time to maturity will also impact on the market value. Deposits are not tradable and can only be broken in exceptional circumstances and at Standard Bank's discretion. While Structured Notes are tradable (subject to a market price being available), you should be prepared to commit your capital invested for the full product term to avoid being impacted negatively by fees.

The minimum return at maturity shows the minimum value that the product is designed to return at maturity. The capital protection, as well as the potential return are dependent upon the Issuer, for Structured Notes, or Deposit Taker, for Structured Deposits, being able to meet its financial obligations. These obligations are only obligations of the Issuer or Deposit Taker as appropriate and in the event that the Issuer or Deposit Taker becomes insolvent or otherwise fails to meet its obligations, payment of the maturity proceeds is not guaranteed by any member of the Standard Bank Group. This could result in the loss of your initial investment / deposit and any potential gain.

Structured Notes are not bank deposits and so are not covered by any form of depositor compensation scheme and are not insured by any governmental agency.
